DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 3-11, drawn to method forming pad-reinforcing electrodes on the pad electrode, classified in class 29, subclass 594.
 - II. Claim 12, drawn to a surface acoustic wave of manufacturing for adhesively sealing a cover to the base member, classified in class 29, subclass 841.
2. Inventions I, and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Group II has separate utility such as adhesively sealing a cover to the base member. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
4. A telephone call was made to W. Douglas Hahm on 11/04/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
